MUNSON, ALBERTA, THURSDAY, AUGUST 30, 1917

Result of the Standing Field Grain Competition of the Agricultural Society

W. S. Jacobs, formerly of Munson, arrived two weeks ago to judge
the standing field grain competition, having been sent by the superin-
tendent of the Seed and Wheat Branch of the Department of Agriculture,
at Edmonton. There was such a large number of entries and so many
good crops in the competition that it took four days with an automobile
to do the judging. Mr. Jacobs stated that he had travelled all over
Western Canada and finds that the crops in this district are the best he
has seen this year and was greatly surprised to see such immense
crops here in such a dry year as Mr. Jacobs puts it, it goes to
show the value of the heavy land.

There were 22 entries for the wheat alone and as the society had to
stick by the rules of the department and award the prize to the cleanest
fields free from weeds and pure in variety of grain, there were many
fields worthy of prizes as regard to the yield, etc., but there were not
enough prizes to go all around, however the competition was a decided
success, and a credit to the district and the prize winners were as follows:

H. C. Currie captured the first prize of \$25 on wheat, having a field
of pure Marquis pedigree seed that the judge estimated would yield near-
ly 50 bushels to the acre.

J. B. Mitchell, Munson, took the 2nd prize of \$20 on his field of
Marquis wheat, which was also worthy of credit.

The third prize on wheat was equally divided between H. B. Stick-
ney and J. H. Emery of Morrin.

The fourth prize was split between A. B. C. Grenville, of Ghost Pine
and A. Sutherland of Sarcus Butte, in these cases scoring equal
points.

The fifth prize was awarded to W. E. Lambert, of Munson.

In cuts the prize winners were: Adam Simola, Mechesha 1st; Harold
Foster, Munson, 2nd; P. J. Rock, Sarcey Butte, 3rd; W. R. Sharp,
Munson, 4th; Levi Wallis, Morrin, 5th.

The prizes in barley were awarded to the following: Cox Bros.,
Munson, 1st; Olsen Bros., Munson, 2nd.

Prize List of the Munson Agricultural Society Continued from Last Week.

1st; Miss Amour 2nd.

Diving team race, A. W. King
1st; Craig Wilson 2nd.

Bucking contest, W. Ritchie.

SAVE THE FAT

Fat and trimmings are too often
thrown away from meat bones, es-
pecially in the case of families who
do not like fat meat. But remem-
ber many will eat fat meat in the
process of dripping and suet in pud-
dings, who refuse it when cut off
meat.

MORRIN NEWS ITEMS

Miss Mattie Barth returned to
Calgary on Saturday last.

Miss Knutson, of Hanna, is visiting
at the home of Mrs. Olsen.

The latest arrival in town is a
"REG," owned by Mr. Moody.

Barth was a business visitor
in Calgary on Tuesday of this week.

Mrs. Dean and children, left on
Tuesday to visit friends and rela-
tives in Ontario.

Karl Smith and Miss Vera Smith
of Davis, visited their sister, Mrs.
DeMills last week end.

R. B. Campbell, of Kincardine,
Ont., arrived on Tuesday to visit
his brothers Frank and Bob
Pearson.

The following Red Cross sewing

has been forwarded to Calgary:

3 henpeck shirts.

2 surgical shirts.

12 Surgeon sleeves.

2 Bed jackets.

FELT and FABRIC HATS BRIDGE the SEASONS

A Chinese Turban from Two Kinds of Satin.

SO IMPATIENT are women growing regarding the change of styles that, if they continue forcing the seasons, they will some day find themselves back to normal, wearing a straw hat in August and a velvet one in February. But not for long would such a state of affairs exist; it would be too preposterous. Very soon an important edict would be sent forth and once again more man would not dare use a woman's hat as a seasonal index. Right now restless woman demands a change from the straw hat, and she has it in the models of felt and fabric.

The spirit of the Orient has been injected in many smart models, and one illustration of this fact is to be found in the black-and-white satin model with its rolled brim, full crown and colorful tassels dangling from the sides.

Do Not Know Germans Yet

The Worst Savages on the Face of the Earth

Since Irish fishermen have been attacked by German U-boats in the peaceful pursuit of their calling, had they sought refuge in Canada, were confiscated, and threatened with the destruction of their villages a change in the attitude of the Canadian and the fishing fraternity, has taken place.

It is the story of a careful fisherman who had saved up to buy a motor boat. She was a beauty and won the admiration of the crew, and the envy of fellow-fishermen. The fabulous prices and good catches her owners' pride, but that was not enough for herself—she had to be fulfilling. Then came the pirates.

He had with him a rifle shot round. The arm of the man at the tiller, the owner's son, spouted a stream of abuse and German words appeared. "I'll teach you to stop when you are told," came in a brutal tone from the German.

"I must go after you to stop you," was the only reply, the owner recognizing that he was engaged in a desperate game of hazard, destined to play out its last scene in hell. "I shall be doing nothing to you."

"I do not care what you are. The next time you are ordered to stop, do not stop," said the captain.

Further, "you are feeding our enemies, the English, with this fish."

Placing his hand on the gun, he complained that owing to lack of transit time it was impossible to get to port, even if not bad when it gets there."

He ordered some of his crew to take what they required of the fish and pitch the rest overboard. Mean while the condemned crew had to eat motor oil and finding solid, valuable lines and a sail, bundled them overboard weighted. Then he got a hammer and a wedge and drove it into his crew with a sledge hammer, broke the working plug and the gas tank, making it impossible for the owner that he would not then smash up the boat itself he had further urged.

Returning to the submarine, he disappeared, but with little delay emerged again, followed by a number of fishermen followed by a number of Irish fishermen whom he had previously captured, and finding solid, valuable lines and a sail, bundled them overboard weighted. This was gally slave work, but had to be done. A point to note is that the marching pirates had replaced any other feeling that the Irish in the district may even have had.

When the wounded man's arm had been attended to the crippled boat was turned toward home, where, after a long labored trip, the man, in his usual state of physical condition, the owner arrived with his companions, a sad but much wiser crew. He had stopped to help the marching pirates that he would not then smash up the boat itself he had further urged.

Returning to the submarine, he disappeared, but with little delay emerged again, followed by a number of fishermen whom he had previously captured, and finding solid, valuable lines and a sail, bundled them overboard weighted. This was gally slave work, but had to be done. A point to note is that the marching pirates had replaced any other feeling that the Irish in the district may even have had.

It was early in May that U-boats of the latest patrol began to stalk the waters of British Columbia. One pirate about 300 feet long popped up in the middle of the ocean, and the crew gave the fishermen in most cases three minutes to get into their small boats, and then exploded a bomb before a patrol appeared. The loss to the fishermen and their families amounts to \$100,000.

The Germans did not spare even the smaller crafts, and they refused to let the women and children remain on these ships. One remonstrated with the U-boat commander: "I thought the German men were the ones to whom you were giving food," said the German.

"Ah, dear sir, you don't know the Germans yet," was the commander's reply.

The Germans boasted that they had sunk 1,000 ships, and that they could not be beaten. They declared that they would have every Irish fishing boat at the bottom of the ocean, and that the men and all their materials said they were going to shell the villages on the coast easily."

The present feeling of the Irish fishermen is shown in a Baltimore skipper's appeal to the Skippers' Patriotic Fund. "The Germans are all America," he said, "that the Germans are the worst savages on earth, that they are the ones who will win, yet, and that we hope and trust, with the aid of our kin and kin in America, that we will be able to save off the face of the earth."

Supplying Material

For Munitions

An official report just made to the United States government showing the extent to which Sweden is furnishing supplies to Germany reveals that the two powers are receiving enormous quantities of material that go directly into the manufacture of munitions.

In exporting iron ore to Germany, Sweden, it is known, has supplied ships with iron from the United States. What this government will do to end this trade through importation of iron ore from the United States has not been announced, but some of the officials say it is, and are urging the United States to do so. The cost of the foodstuffs to Sweden until a definite understanding has been reached with the United States concerning her exports to Germany.

Stranger (trying to be friendly)—How's your health?

Mr. Chronic (gruffly)—How do I know? I haven't had any for two years.—Hawley.

Long Working Hours

Girl Shall Makes Treated Like Slaves in Germany

Between the years 1882 and 1907 the number of women employed in the peaceful pursuit of their calling, had their working hours increased, were confiscated, and threatened with the destruction of their villages a change in the attitude of the Canadian and the fishing fraternity, has taken place.

It is the story of a careful fisherman who had saved up to buy a motor boat. She was a beauty and won the admiration of the crew, and the envy of fellow-fishermen. The fabulous prices and good catches her owners' pride, but that was not enough for herself—she had to be fulfilling. Then came the pirates.

He had with him a rifle shot round. The arm of the man at the tiller, the owner's son, spouted a stream of abuse and German words appeared. "I'll teach you to stop when you are told," came in a brutal tone from the German.

"I must go after you to stop you," was the only reply, the owner recognizing that he was engaged in a desperate game of hazard, destined to play out its last scene in hell. "I shall be doing nothing to you."

"I do not care what you are. The next time you are ordered to stop, do not stop," said the captain.

Further, "you are feeding our enemies, the English, with this fish."

Placing his hand on the gun, he complained that owing to lack of transit time it was impossible to get to port, even if not bad when it gets there."

He ordered some of his crew to take what they required of the fish and pitch the rest overboard. Will Export Under Federal License

States to Get Own Wants First, Allies Next, and Then the Neutrals

Subscriptions of many important companies in the United States, except under federal license, will be barred on and after July 15 by President Wilson's proclamation, putting into operation the so-called参议院 bill, authorizing government control of exports of all the list of commodities, including all mineral products and fertilizers.

American firms will be given first preference in the allies' next and then neutral nations, according to a statement issued by the president.

Most of the big corporations, for example, many big enterprises, are not yet organized to meet the new law.

Witness, for example, the Bessemer Steel Company, which was so late in finding its way to the new law that it has not yet been able to put into effect a program to control exports.

The Bessemer company has not yet been able to put into effect a program to control exports.

Outlook Was Dark

British Columbia Was Born In Gloomy Days

The province of British Columbia was formed at a time when the world was in a gloomy condition. It was a time of war, when the world was at war, and while the United States over a boundary dispute with the territory of Alaska.

The people of British Columbia were probably aware of the fact that the country had many old bald hills, many a stream of mud, and many a river that was muddy and full of mud.

The people of British Columbia were probably aware of the fact that the country had many old bald hills, many a stream of mud, and many a river that was muddy and full of mud.

The people of British Columbia were probably aware of the fact that the country had many old bald hills, many a stream of mud, and many a river that was muddy and full of mud.

Exhibited In Sumptuous Quarters

Treasures of Poland Still in Museum of the Alps

Recent developments in the great historical review of the frontiers and while most Americans are well acquainted with the tragic reverses of this one year, few are probably aware of the fact that the ancient and valuable treasures of Poland still remain in the museum of the Alps.

The people of the United States were compelled to leave their homes in the winter of 1915-16 because of the war, but the Polish race could not be wiped out, and that the Poles were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.

The Hudson's Bay Company, political and social life, and the economy of the country, were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.

The Hudson's Bay Company, political and social life, and the economy of the country, were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.

The Hudson's Bay Company, political and social life, and the economy of the country, were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.

The Hudson's Bay Company, political and social life, and the economy of the country, were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.

The Hudson's Bay Company, political and social life, and the economy of the country, were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.

The Hudson's Bay Company, political and social life, and the economy of the country, were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.

The Hudson's Bay Company, political and social life, and the economy of the country, were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.

The Hudson's Bay Company, political and social life, and the economy of the country, were still living in the same castles and fortresses as they had done in the days of King Boleslaw the Great.
